## EDUCATION

---

### TERI School Of Advanced Studies, New Delhi

Master of Business Administration (Sustainability Management), Majoring in Finance | SGPA: 8.02 2024- 2026

### College of Agriculture, University of Agricultural Sciences, Bangalore

2019- 2023

B.Sc. (Hons) Agricultural Marketing and Co-operation | CGPA: 8.736

## EXPERIENCE

---

### Sustainability Intern

Hyderabad, Telangana

Amara Raja Group

Jan 2026- Present

- Conducted Eco Vadis and CDP gap assessments, performing ESG data validation, quality checks, and gap analysis to strengthen reporting accuracy and compliance readiness.
- Built a custom Employee Water Footprint Calculator from scratch using HTML, CSS, and JavaScript to help employees understand and reduce their individual water usage, support awareness initiatives across an estimated 200+ employees and contribute to the company's broader water stewardship objectives.

### Energy Intern

Gurugram, Haryana

Jindal Stainless Limited

Jun 2025- Aug 2025

- Evaluated technical and economic feasibility of 125 MW coal gasification plant, including technology mapping, material/energy balances, and 30-year CAPEX/OPEX modeling and LCOE Benchmarking, projected to reduce Scope 2 emissions by ~20-25%.
- Developed CAPEX scenarios for green hydrogen integration in steelmaking, analyzing imported/domestic electrolyzers with/without policy incentives to support decarbonization strategies.

### Research Associate

Bengaluru, Karnataka

Rareminds

Dec 2023- May 2024

- Developed course materials for 2 major upskilling programs (Agribusiness Management and Organic Food Production and Spoken English) under the Naan Mudhalvan Scheme, contributing to a statewide employability initiative that has reached over 3 million students across Tamil Nadu.

### Research Intern

Guntur, Andhra Pradesh

ITC Ltd, Agribusiness Division

Dec 2022- April 2023

- Designed and localized digital crop advisories for 10 millet and pulse crops on the ITC MAARS app, contributing to a digital agriculture platform impacting over 1.7–2.2 million farmers across 10+ states through AI-enabled and climate-smart advisory solutions.
